## KALTENBACH KPS 515 USED PUNCHING AND SHEARING MACHINE

### WHAT'S IN IT FOR YOUR WORKSHOP?

At its core, the Kaltenbach KPS 515 combines cutting-edge technology with innovative design, providing an integrated solution for both punching and shearing processes. This eliminates the need for multiple machines, streamlining workflows and reducing operational complexities.

User-friendly controls and intelligent programming make operation intuitive, optimising cutting settings for different materials and tasks. The robust construction of the KPS 515 guarantees longevity and minimised maintenance requirements, contributing to increased operational uptime.

### TECHNICAL DESCRIPTION

- Massive steel Portal-frame, with totally 15 punch- and 24 die tools.
- The punch- and die tools are set up independent on an under- and upper carousel. Servo motor and a mechanical blocking system bring and hold the carousel on the exact and guaranteed position.
- Hydraulic down holding and material correction device (4 t), arranged on the in- and outfeed side of the material.

### TERMS AND CONDITIONS

- Machine subject to availability
- Payment: 50% down payment immediately after conclusion of contract + 50% before start disassembling
- Delivery: immediately ex location, Australia
- Warranty: Used machine, no warranty
- Transport: Not included

### OTHER IMPORTANT INFORMATION

- The price does not include disassembly nor assembly. This is an additional service we offer
- Flights and travelling costs + hotels for our technicians borne by the customer
- The machine is in very good condition, revised by the USM team, can be inspected and can be seen in operation
- **This quotation is valid for 2 weeks.**
